## Thoughts for Thoughts

We make a living by what we get. We make a life by what we give. - Winston Churchill

## Tips & Information

Isaac Newton was one of the world's greatest scientists because he took his ideas, and the ideas of earlier scientists, and combined them into a unified picture of how the universe works. Some of you may have heard the story of the apple falling on his head & him coming up with the Universal Law of Gravitation, well thankfully it did not hit his head, it just fell from the tree in front of him. That is where his idea of the "force" of gravity started. To this day he is still known as a great mathematician and physicist. In 1687, he published Philosophiae Naturalis Principia Mathematica.

**\*\*Menu Subject to Change\*\***  
A variety of milk will be served at each meal.

In the operation of child feeding programs, no child will be discriminated against because of race, sex, national origin, color, age or handicap. If you believe that you have been discriminated against, write to the Sec. of Agriculture, Washington DC, 20250
